

Figure F.5: Several physical adversarial examples that utilize 2D printed adversarial patterns.

Figure F.6: The figure illustrates several examples of physical adversarial camouflage with or without the use of a neural renderer.

Figure F.7: This figure illustrates different forms of physical adversarial attacks associated with the visible light transmission channel.

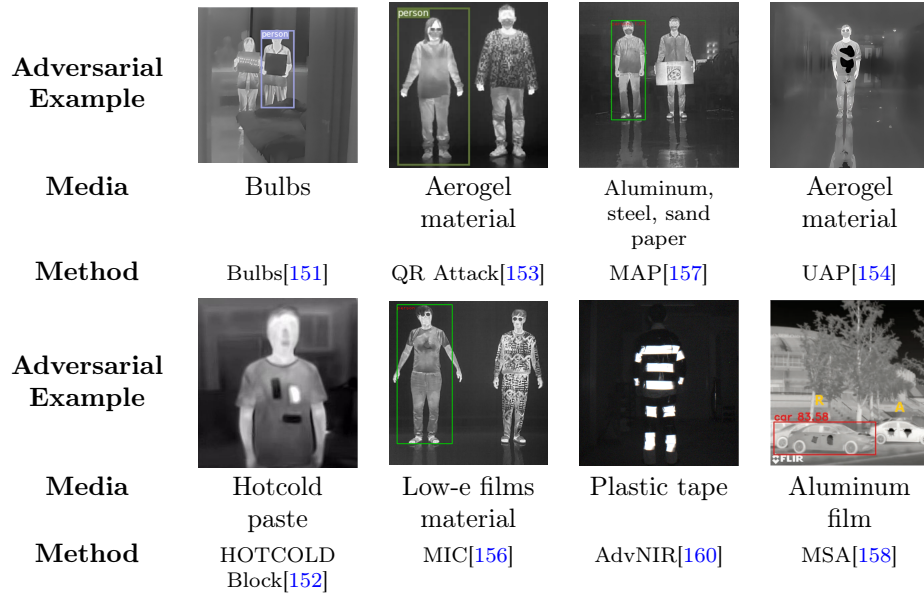

Figure F.8: This figure illustrates different physical adversarial materials and adversarial examples within the infrared light transmission channel.

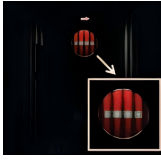

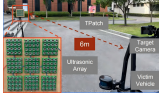

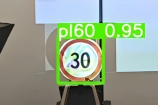

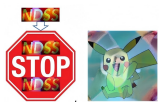

Adversarial Example				
Signals	Laser signals	LED illumination	Acoustic signals, patch	IEMI
Method	Rolling Shutter[168]	MLIA[170]	TPatch[174]	GlitchHiker[180]
Adversarial Example				
Signals	Projector, High-frame-rate videos	Infrared laser signal	Laser signal, patch	Projector
Method	Zhou et al.[171]	Agile[173]	L-HAWK[172]	DETSTORM[183]

Figure F.9: Illustration of physical adversarial attacks against image perception devices and corresponding signal sources.
