

Appendix A. List of Abbreviations

The abbreviations of items used in this article are listed in Table A.12.

Table A.12: The list of abbreviations(Abbr.) corresponding to the items used in this article.

Type	Item	Abbr.	Item	Abbr.
VT	Image Classification	IC	Lane Detection	LD
	Image Retrieval	IR	Traffic Sign Recognition	TSR
	Image Description	ID	Traffic Sign Classification	TSC
	Image Segmentation	IS	Traffic Sign Detection	TSD
	Image Captioning	ICap	Object Tracking	OT
	Face Recognition	FR	Person Re-identification	PRI
	Crowd Counting	CC	Visual Object Tracking	VOT
	Object Detection	OD	Visual Question Answering	VQA
	Person Detection	PD	Automatic Checkout System	ACo
	Vehicle Detection	VD	Autonomous Driving System	ADS
	Aerial Detection	AD	Autonomous Driving Steering Model	ADSM
VMa	Real Systems	RS	CNN-based architecture	CNN
	Transformer-based architecture			TF
AdvK	Black-box	BB	Gray-box	GrB
	White-box	WB		
AInt	Untargeted attack	UT	Targeted attack	T
Gen	Black-Box Query	BQ	Generative Models	GM
	Gradient-based	GB	Surrogate Models	SM
Camera	Camera Inertial Sensor	InSensor	Image transmission lines	ITL
	Camera Lens	CLs	Camera Image Processing Pipeline	CISP
Other	Generation or optimization methods			Gen
	Printed on non-rigid surface and attached			Printed on NRS
	Printed examples and photographed			Printed-Photo
	Contaminating the light transmission channel			LTC
	Interfering with image perception devices			IPD
	Infrared Light	IRL	Injected acoustic signal	Inj-Acoustic
	Adversary's knowledge	AdvK	Manipulating Physical objects	POM
	Transferability	Tra	Perceptibility	Per
	Victim tasks	VT	Adversary's intention	AInt
	Adversarial pattern	AP	Physical adversarial attack	PAA
	Number of papers	Nums	Physical deployment methods	PDM
	Adversarial camouflage	AC	Victim model architecture	VMa
	means covered	✓	Visible and infrared light	VIL
	means not covered	×	Infrared light adversarial pattern	IRAP
	means not mentioned	–	means partially mentioned	○
